- » FCL/LCL service
- » Heavy Lift & oversized cargo
- » Stevedoring services
- » Liner agency
- » Continuous receiving for LCL services
- » Cross-trade services
- » Ships chartering

## Freight Forwarding

As a multi-modal transport operator, we take pride in being able to deliver a comprehensive deep-sea shipping and freight forwarding service to all of our customers.

We undertake all aspects of operational and administrative activities to ensure that consignments reach their destination quickly and securely within your specified time schedules. This includes the production of all export and import documentation and management of full customs clearance formalities.

We constantly monitor freight rates and transit times from all the major shipping lines and provide you with the most competitive rates for your cargo.

## Ship Chartering

Throughout the company we have senior members on the team who have extensive experience on ships chartering. We offer full cargo routing proposals, including advice on cargo lifting, stowage and securing for out of gauge, heavy and otherwise 'special' cargoes and where needed we can provide route surveys for complex movements.
