PROJECT FREIGHT FORWARDING & MANAGEMENT

LV Shipping & Transport is one of the market leaders in project freight management, which has developed largely through our involvement in high profile projects for the Oil & Gas and Wind Farm construction industries. We provide forwarding and logistics services for the movement of materials and oversized equipment for a wide variety of industries.

Oil & Gas

Energy

Steel Industry

Construction & Mining

Maritime Services

A Comprehensive Service

We have a highly experienced and hands-on Management Team and project personnel, who fully understand the specific requirements of individual projects. Our services are tailored to meet the clients' individual requirements in accordance with the highest HSSQE, social responsibility, compliance standards and Risk Management Policies.

Our mission is to manage all interfaces ensuring a smooth, efficient and seamless service by coordinating the numerous activities required to deliver a successful project.

All of which are carried out in accordance with quality standard ISO 9001 as well as health safety & environmental standards ISO 14001 and ISO 18001.

Services include:

- » Secure warehousing & distribution (Offshore Express service & courier service)
- » Import and export compliance & customs clearance
- » Charter services for air, sea & heavy haul moves
- » Logistics Project Management & in-house personnel
- » Line item tracking & reporting with full web visibility & milestone reporting
- » Exclusive storage areas & export packing
- » Procurement & expediting

We offer consulting, planning, preparation and execution capabilities all in one personal service, from inception to completion, whether the components originate from one country or from across the globe.

This includes elements such as:

- » Risk assessments & method statements
- » Route surveys
- » Technical drawings
- » Loading plans
- » Lashing & securing plans
- » Lifting & slinging calculations
- » Supervision & attendance
